Chemistry/Engineering Dual Degree Program (B.S.)

Location(s): [Dahlonega](#), [Gainesville](#)

← Return to: [Programs](#)

120 hours

The University of North Georgia offers a dual degree program which allows students to receive a bachelor's degree in chemistry from UNG and a bachelor's degree in engineering from a participating university. Students are provided the opportunity to attend the University of North Georgia for approximately three years before embarking on approximately two years of engineering coursework at the University of Georgia, Georgia Institute of Technology, Georgia Southern University, Kennesaw State University, Clemson University, or Mercer University. After completing the academic requirements of both institutions, the student receives a bachelor's degree in chemistry from the University of North Georgia and a bachelor's degree in a chosen engineering field from the second institution.

UNG faculty and staff work closely with the faculty of the engineering schools to assure a curriculum which is well-coordinated. Dual degree students first satisfactorily complete the UNG required curriculum and pre-engineering curriculum required by the transfer institution, and then apply for transfer to the engineering school. However, admission to the engineering

school will also be based upon the specific requirements of each program, such as overall grade point average, math–science grade point average, and other factors determined by that institution. These requirements vary, and each school’s transfer expectations and requirements are listed on their website. UNG faculty and staff advisors in the related dual degree field should also be consulted for their assistance with the dual degree process.

Dual Degree Requirements:

1. Complete the course work required by UNG as given below.
2. Complete the course work required to transfer to the chosen institution with their required GPA.
3. Complete the required engineering program at the transfer institution.
4. Apply for the second B.S. degree from UNG.

Core IMPACTS – 42 hours

Refer to Core IMPACTS

Institution: No exceptions

Mathematics: MATH 1450

Citizenship: No exceptions

Humanities: No exceptions

Writing: No exceptions

STEM: PHYS 2211/L/K, PHYS 2212/L/K, and CSCI 1371 recommended

Social Sciences: No exceptions

Field of Study – 18 hours

- CHEM 1211 – Principles of Chemistry I
- CHEM 1211L – Principles of Chemistry I Laboratory
- (or CHEM 1211K – Principles of Chemistry I)
- CHEM 1212 – Principles of Chemistry II
- CHEM 1212L – Principles of Chemistry II Laboratory
- (or (or CHEM 1212K – Principles of Chemistry II)
- MATH 2460 – Calculus II
- MATH 2470 – Calculus III
- 1 hour from Core IMPACTS Mathematics
- 1 elective hour in any 1–2000 level ENGR or CHEM course

Major Requirements – 60 hours

Required Courses - 28 hours

- CHEM 2734 – Analytical Chemistry
- CHEM 2734L – Analytical Chemistry Laboratory
- CHEM 3441 – Organic Chemistry I
- CHEM 3441L – Organic Chemistry I Laboratory
- CHEM 3442 – Organic Chemistry II
- CHEM 3442L – Organic Chemistry II Laboratory
- CHEM 3911 – Junior Seminar
- MATH 3000 – Differential Equations

Choose 2 (Lectures/Labs):

- CHEM 3541 – Physical Chemistry I
- CHEM 3541L – Physical Chemistry I Laboratory
- CHEM 3542 – Physical Chemistry II
- CHEM 3542L – Physical Chemistry II Laboratory
- CHEM 4744K – Instrumental Analysis
- CHEM 4244 – Inorganic Chemistry
- CHEM 4244L – Inorganic Chemistry Laboratory

Choose One:

- PHYS 3111 – Mechanics I
- PHYS 3411 – Electricity and Magnetism I
- PHYS 3610 – Thermal Physics

Electives

- To bring the number of University of North Georgia credit hours to 90 and total credit hours to 120 for the degree.

Other Requirements

- US and Georgia History Requirements
- US and Georgia Constitution Requirements
- Regents' Skills Program Requirements
